The minutes of the 36th Working Group meeting held on 29th-30th September 2020 were agreed by written procedure on 13th October 2020⁴.

5. Scientific topic(s) for discussion

5.1 Re-evaluation of the risks to public health related to the presence of bisphenol A (BPA) in foodstuffs and protocol for the risk assessment strategy (EFSA-Q-2016-00635)

A short presentation was provided to guide the experts through the structure of the BPA project in TEAMS.

The main decisions and actions taken during the previous WG meeting with regard to the criteria for NMDR indication in the WoE, the transition from the WoE to the BMD analysis and the specifications for all the WoE answers were quickly recapped to the experts.

Issues on dose-conversion were discussed and solutions provided to encounter the problems with regard to animal species different than murine.

The experts worked then in pairs/tris to discuss and answer to pending questions on their more recent studies appraisals and relevant endpoints identification in their own specific HoC.

In view of the next WG meeting experts and EFSA staff were assigned with new tasks.

² Participation only on 2nd day

In accordance with EFSA's Policy on Independence³ and the Decision of the Executive Director on Competing Interest Management⁴, EFSA screened the Annual Declarations of Interest filled out by the Working Group members invited to the present meeting. No Conflicts of Interest related to the issues discussed in this meeting have been identified during the screening process, and no interests were declared orally by the members at the beginning of this meeting.

4. Agreement of the minutes of the 34th Working Group meeting held on 2nd July 2020, via teleconference

The minutes of the 35th Working Group meeting held on 15th-16th July 2020 were agreed by written procedure on 27th July 2020⁵.

5. Scientific topic(s) for discussion

5.1 Re-evaluation of the risks to public health related to the presence of bisphenol A (BPA) in foodstuffs and protocol for the risk assessment strategy (EFSA-Q-2016-00635)

A feedback on the weight of evidence ongoing exercise on the animal studies was provided by the experts for all the health outcome categories. The drafts of the texts on cardiotoxicity and neurotoxicity for the draft opinion were discussed.

The criteria for a non-monotonic dose-response were discussed taking into account the draft opinion from the SC Working Group on NMDR.

Issues on dose-conversion were clarified; a thorough discussion on how to select the studies and the endpoints from the WoE to be brought forward for the BMD was held.

The experts worked then in pairs/tris to discuss and answer to pending questions on their more recent studies appraisals and relevant endpoints identification in their own specific HoC.

In view of the next WG meeting experts and EFSA staff were assigned with new tasks.

In accordance with EFSA's Policy on Independence³ and the Decision of the Executive Director on Competing Interest Management⁴, EFSA screened the Annual Declarations of Interest filled out by the Working Group members invited to the present meeting. No Conflicts of Interest related to the issues discussed in this meeting have been identified during the screening process, and no interests were declared orally by the members at the beginning of this meeting.

4. Agreement of the minutes of the 34th Working Group meeting held on 2nd July 2020, via teleconference

The minutes of the 34th Working Group meeting held on 18th-19th June 2020 were agreed by written procedure on 2nd July 2020⁵.

5. Scientific topic(s) for discussion

5.1 Re-evaluation of the risks to public health related to the presence of bisphenol A (BPA) in foodstuffs and protocol for the risk assessment strategy (EFSA-Q-2016-00635)

A feedback on the data extraction and the weight of evidence (WoE) of the epidemiological studies was provided by the experts and discussed in plenary. The final revision of the WoE for cardiotoxicity with the corresponding text and the update of the WoE for immunotoxicity were also discussed. Suggestions on how to better structure the text were given.

The criteria for a non-monotonic dose response were re-discussed and clarified. In addition, it was discussed how to deal with the transversal endpoints in the WoE. Some issues regarding the NTP core study were clarified.

The experts worked then in pairs/tris to discuss and answer to pending questions on their more recent studies appraisals and relevant endpoints identification in their own specific HoC.

In view of the next WG meeting, the experts were assigned with new tasks.

5. Scientific topic(s) for discussion

5.1 Re-evaluation of the risks to public health related to the presence of bisphenol A (BPA) in foodstuffs and protocol for the risk assessment strategy (EFSA-Q-2016-00635)

A feedback from the experts who started working on the weight of evidence (WoE) in their specific health outcome category (HoC) was given to the other WG members. During the discussion, some clarifications were provided.

A discussion on the opinion template was also started, specifically on how to report in writing the rationale behind the grouping of the relevant endpoint into clusters and the outcome of the WoE exercise.

Some pending questions on the approach to take regarding the absolute and relative organ weights were solved.

The experts worked then in pairs/tris to discuss and answer to pending questions on their more recent studies appraisals and relevant endpoints identification in their own specific HoC.

3. Declarations of Interest of Working Groups members

In accordance with EFSA's Policy on Independence¹ and the Decision of the Executive Director on Competing Interest Management², EFSA screened the Annual Declarations of Interest filled out by the Working Group members invited to the present meeting. No Conflicts of Interest related to the issues discussed in this meeting have been identified during the screening process, and no interests were declared orally by the members at the beginning of this meeting.

4. Discussion

EFSA secretariat and the Chair of the WG introduced the EFSA's way of working, including the respective roles of the Panel and of the WG members, presented the EFSA mandate on the BPA re-evaluation and the EFSA's previous opinion (2015) and work on BPA, focusing most of all on the hazard protocol for the re-assessment of BPA. A live demonstration on the use of DistillerSR software to be used for study appraisal was given.

The work to be carried out by the WG on BPA re-evaluation implies to evaluate all the scientific literature published after 2012 till mid-October 2018 and the data received through EFSA "call for data", not previously appraised by EFSA, using the EFSA's protocol for the BPA hazard assessment.

In a first phase the WG will have to test the protocol methodology as regards to study selection and appraisal on a set of studies already evaluated by EFSA, in order to check if the new methodology works adequately and if the appraisal of the same study using the "old" and "new" methodologies gives a similar outcome.

The pilot phase outcome will be publicly communicated in an EFSA technical report and in a dedicated public event.

After the pilot phase, the WG will undertake the re-evaluation of BPA safety.

The experts made a trial of the studies appraisal on one example and the outcome was discussed by the group.

Individual tasks and deadlines were assigned to the WG members and dates for the next WG meetings were proposed.

5. Next meeting(s)

The next WG meeting is planned on 28th September 2018, by teleconference.
